Rear Fiberglass

HL = Hand Laid - Hand Laid panels are produced by placing pattern cut fiberglass mat and fiberglass resin into a mold. Hand Laid panels are smooth on only one side.

SMG, SMW = Smooth (gray)(white) (black) - These Hand-Laid panels are smoothed on the inside to give a press-molded look at a more economical price. Available in several colors.

PM = Press Molded - Press Molded panels are formed under pressure in matched molds as the original parts were. Press Molded parts are smooth on both sides.
